

TESTIMONIAL

I have regularly engaged the services of Jane Burns, registered nurse and other health professionals employed by the Lighthouse Health Group Pty Ltd since establishment of the company in 2001.

Over the past 14 year period, I have requested and obtained numerous specialist medico-legal reports on behalf of my catastrophically injured clients. At all times, I have found the services provided by Lighthouse Health Group to be extremely professional and the professional staff are highly qualified and knowledgeable in their areas of speciality. Over the years, I have obtained specialist medico-legal reports from clinical nurse consultants, occupational therapists and physiotherapists employed by the Lighthouse Health Group. I have always been impressed with the quality of medico-legal reports provided and have found the professional staff knowledgeable, approachable and able to substantiate their expert opinions both in written reports and when participating in joint expert conclaves or giving evidence.

I am aware that the professional staff employed by the Lighthouse Health Group are highly regarded by other allied health professionals and specialist doctors throughout Australia. At all times, I have been impressed by the manner in which the clinical nurse consultants, occupational therapists and physiotherapists have engaged with other experts retained in my matters such as architects, rehabilitation physicians and specialist care providers.

Lighthouse Health Group have also been involved in providing case management services to some of my clients in the past and I am aware that these clients were very impressed with the case management services and support provided.

Whilst the professional staff at Lighthouse Health Group obviously have a heavy workload, I have always been impressed by their ability to manage deadlines and Court imposed timetables when required. Numerous experts of different specialities have assessed my clients within their homes in order to provide expert opinions in relation to their current and future treatment and rehabilitation needs. My clients have always found the consultants employed by the Lighthouse Health Group to be punctual, well prepared, sympathetic to their needs and knowledgeable in relation to specialist disability services available together with appropriate disability equipment.

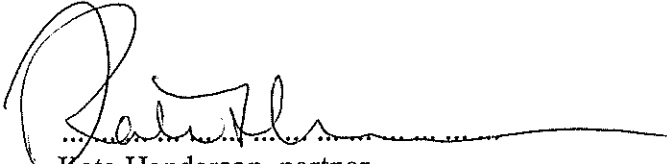

I am aware that Jane Burns has extensive clinical nursing rehabilitation and case management experience and Jane is a certified life care planner. Jane has prepared many complex nursing services and equipment reports on behalf of my catastrophically injured clients over the years. These reports have assisted in identifying the associated costs of complex disability services and care. As a result, these reports have been integral in achieving successful settlements and judgments for many of my catastrophically injured clients. I am also aware that Jane has significant experience giving evidence in trials following provision of reports.

A number of my catastrophically injured clients have been based in rural areas and Jane's continuing involvement as a long term provider of case management services for claimants with catastrophic injuries has meant that she has up to date information and contacts in various regions of Australia. As a result, Jane has always been able to identify care providers who are actually in a position to provide the complex level of care required in the particular area where the client is located. I have always found that Jane provides a convincing rationale

for the nursing care prescriptions provided within her expert reports and her opinions are based on up to date information and applicable rates for suitable care providers.

I have primarily engaged the services of Lighthouse Health Group to assess and provide expert reports in complex matters involving paediatrics, spinal cord injury, traumatic brain injury and cerebral palsy matters. I have no hesitation in recommending Jane and her team of experienced nurses and allied health care professionals.
